THE "Jumbo" gas burner shown here at the right, (actual size) is a pobber on any gas lighting fixture in Chicago. If you have one, get rid of it! It make high gas bills and causes a great many of the complaints that come to us.

Claims that a "Jumbo" will give more light without using more gas are false.

This Is the "Jumbo" Gas Burner

Use mantle burners to get more light with less gas. Burning five shours a day for a month, the "Jumbo" consumes \$2.30 worth of gas; a "Junior" mantle burner, in the same times and the same times and the same times and the same times and the same times are times as a same time. in the same time, consumes only 39 cents worth, or \$1.91 less, and gives much more light.
